Magnolia Classic 2018

This year's event was a great fun outing. This year there was plenty of food, nice prizes and uncrowded skies.

This year's event was more lightly attended than usual and I don't know exactly why. The weather was great and those that attended were invited back to the food table to help eat up the remaining hamburgers and hot dogs. One good side effect was that there were no delays in flying.

We did have some airplane parts and goodies changing owners. This is always a very popular part of any fly-in.

Another thing that caught lots attention was a gigantic Stick with an on-board electric starter. Too cool!

Editor's Note: Let's start listing projects, new planes, and maiden flights. If you have any of these email them to me at waynenjoni@gmail.com.

I'll go first: I am just finishing up on a kit-bashed Tower Hobbies Uproar 60. The wingspan has been extended to approximately 80 inches; the ailerons have been changed to a more conventional shape along with a little cosmetic change to the vertical stabilizer. The bright orange bird will be powered by an ASP .91ABC - Wayne
